## **ACKNOWLEDGEMENT**

We take this opportunity to offer our significant thanks and profound respects to our guide Mr. Amit Kumar Roy for his excellent direction, monitoring and support over the span of this whole project. The blessing, help and direction given by him shall take us far in the voyage of life on which we are going to set out.

We also take this opportunity to express a profound feeling of appreciation to Mr. Mahendra Singh Sagar and Ms. Deepti Aggarwal, Asst. Professor, TMU, for their sincere help, important data and direction, which helped us in finishing this assignment through different stages.

We are also obliged to staff individuals from TMU, for the important data given by them in their separate fields and are thankful for their participation amid the time of our task.

Finally, we thank the almighty, our folks, sibling, sisters and companions for their steady consolation without which this task would not have been conceivable.

Paras Rastogi (TCA1409048)

Swapnil Jain (TCA1409072)

**Place: Moradabad**

## 1 Project Title

“Smile Farm- an e-Revolution for Farmers”

The main objective of the project is to take the latest information and knowledge inputs to the farmers so that they can improve their productivity and economic wellbeing by registering and addressing their issues on the designed portal for effective communication and solutions.

## 2 Problem Statement

The Indian farmers are dependent on timely supply of the fertilizers for maintaining their soil productivity. Majority of the Indian farmers are very poor and illiterate which results in improper application of fertilizers. They lack in awareness and education and often depend on unscrupulous middlemen for advice.

The objective is to take the latest information and knowledge inputs to farmers so that they can improve their productivity and improve their economic well-being.

## 3 Project Description

The motive of this report is to define scope and necessities of an agricultural initiative “Smile-Farm”. It is a vision of extending e-revolution to farmers and cooperatives via a 3-pronged method:

- a) Development of know-how inputs and e-services of relevance to rural India,
- b) Evolve powerful dissemination techniques to inspire energetic use of the facilities via farmers & cooperatives,
- c) The broad intention is to empower farmers and cooperatives through modern day in data and communication era.

### 3.1 Scope of the Work

“Smile-Farm” will provide a secure user-id/password based login mechanism to access its services. Once logged in to the community, the user (Administrator/Content Manager/Subject Matter Expert, SME/Farmer) can use the services to fulfill their requirements. Login will be a prerequisite to use Smile-Farm. Internal users will be provided user id/password pair separately.

Once user logs in, s/he can view the dashboard of farmer queries with status, Latest Tips and Advisories added by SMEs are displayed.

### 3.2 Project Modules

Smile Farm is an independent cloud community and it will have a navigation menu on the top consisting of tabs (modules) as per the access privileges specified to each user by the administrator.

- **Chatter:** this is the default landing page of each user when logged into the Smile Farm community. This module enables the user for interacting with each other effectively.
- **Dashboards:** this module is made available to both the administrator as well as the content manager. Dashboard module consists of the "Smile Farm Tracking System" to keep track of all the records present in the Smile Farm.
- **Master Modules:** this module is made available to both the administrator as well as the content manager. Master modules include specific modules such as State Master, Location Master, Category Master and SME master for data entry.
- **Category Modules:** this module is made available to both the administrator as well as the content manager. Category Modules include specific module such as SME category for the data entry.
- **Reports:** this module is visible to both the content manager as well as the administrator for creating and analyzing the prepared reports.
- **Query Module:** this module is only visible to the farmer for addressing their issues and posting their queries. All their queries are resolved by the SME via Resolved Queries/Pending Queries module.
- **Farmer Details Module:** this module is solely made available to the farmers and the SME for registering and responding to farmer's queries respectively.

### 3.3 Context Diagram (High Level)

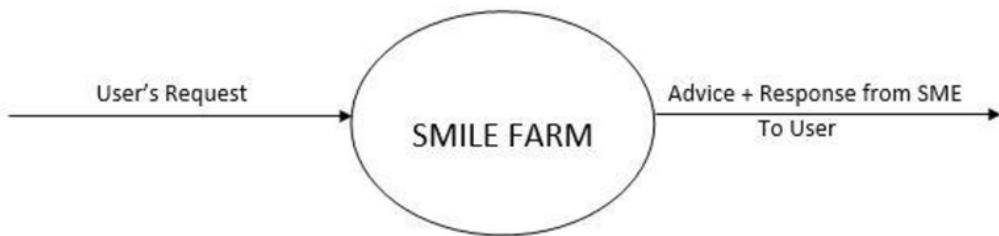

Fig. 1: 0 – Level DFD

## 4 Implementation Methodology

All the modules of the “Smile-Farm” have been designed together to serve the purpose of interactiveness and ease of access to its different users by the help of Salesforce CRM.

The high level functional requirements for the Smile-Farm are outlined in the Use Case diagram described in this section.

Smile-Farm will provide a secure user-id/password based secured login mechanism to access its services. Once user logs in, s/he can view the dashboard of farmer queries with status, Latest Tips and Advisories added by SMEs are displayed. The implementation methodology can be well understood by the following Use-Case Diagram of ‘Smile-Farm’:

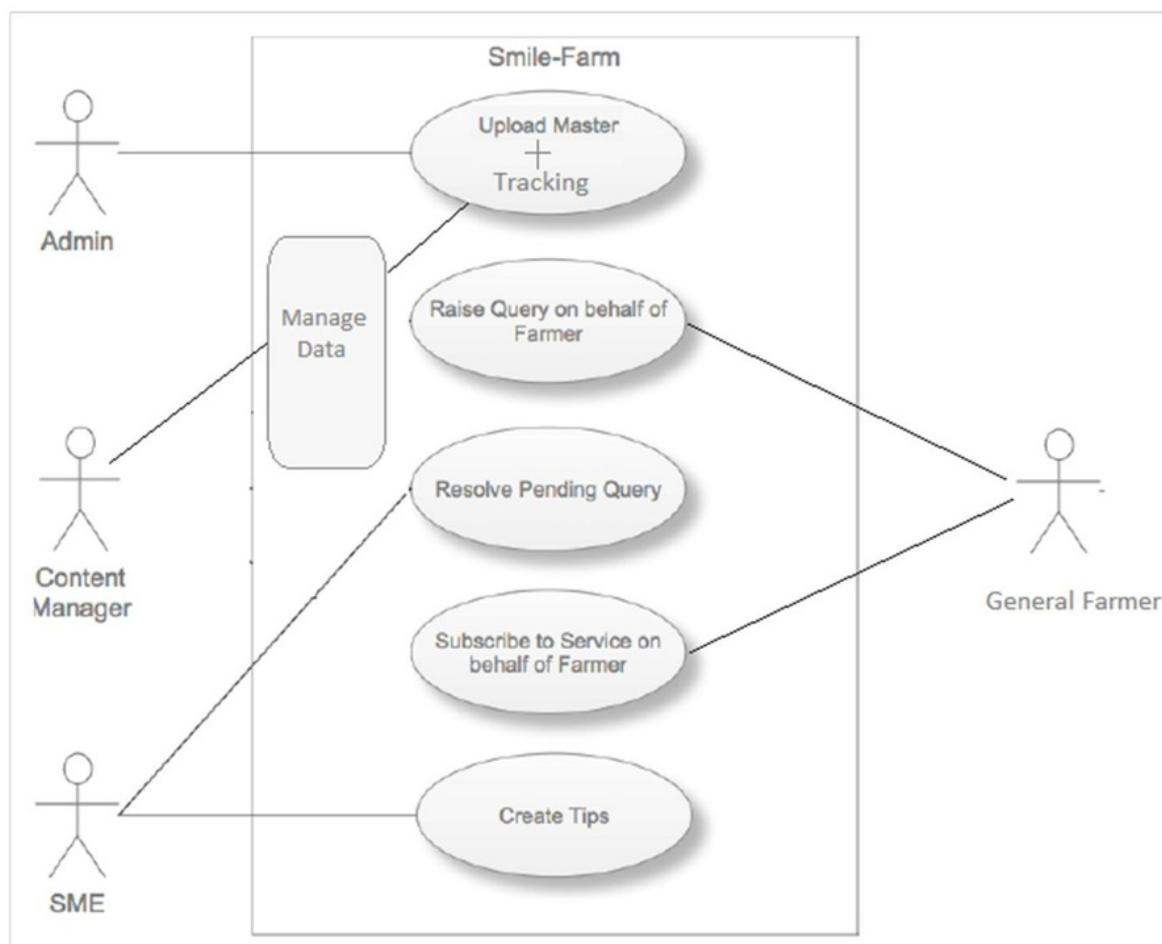

Fig. 2: UCD

**Test Cases:**

Test Case ID	Test Title	Test Case Description	Pre-condition, if any	Expected Results
TC001	Login	Only the authorized users (farmer/admin/SME/content manager) can sign into the Smile-Farm.	None	Successful Login of authorized user only.
TC002	Data visibility	Testing the extent of data visible to each user (farmer/admin/SME/content manager).	None	Successful Data visibility to each respective user.
TC003	Chatter Tab	Checking the "Chatter tab" to ensure a bi-directional communication between users.	None	Successful Bidirectional communication established between users.
TC004	Signup Procedure	Checking the Sign-up procedure to ensure data entry into the database.	None	Users signed up successfully.
TC005	Email Service	Testing the delivery of E-Mail when a new farmer account is created.	None	Successful Email Delivery to users.
TC006	SMS Service	Testing the delivery of 'welcome SMS' when a new farmer signs up on the system.	None	Successful Delivery of SMS to the farmer's phone number.

## 5 Technologies to be used

### 5.1 Software Platform

- a) **Front-end:** Salesforce.com
- b) **Back-end:** Salesforce.com Cloud Database

## 5.2 Hardware Platform

7

### MINIMUM HARDWARE CONFIGURATIONS:

PROCESSOR: 800 MHz Intel Pentium III or equivalent.

RAM: 2GB

Hard Disk: 800 MB of Free Disk Space.

OS: Microsoft Windows XP/7/8/10.

Browser: Chrome (Recommended), Microsoft Edge, Mozilla Firefox etc.

5

### RECOMMENDED HARDWARE CONFIGURATIONS:

PROCESSOR: 2.6 GHz Intel Pentium IV or equivalent.

RAM: 4 GB

Hard Disk: 2 GB of Free Disk Space.

OS: Microsoft Windows XP SP3/7/8/8.1/10, Ubuntu 11.04, Macintosh OS X 10.6 Intel.

Browser: Chrome (Recommended), Microsoft Edge, Mozilla Firefox etc.

## 5.3 Tools:

The tool that is used in SMILE FARM is as follows:

1. **Tool Name:** Apex Data Loader

**Vendor Name:** Salesforce

**Version Number: 19.00.2**

The Salesforce Data Loader / Apex Data Loader is a customer utility for the bulk import or export of statistics. The Apex Data Loader is a java-primarily based application which could bulk process the insert, update and delete on all item facts into and construct queries to extract statistics out of salesforce.com the use of the Apex Web Services (SOAP) API.

## 6 Advantages of this Project

The main advantages of 'Smile-Farm' are as follows:

- Raising 'Awareness'.
- Availability and source of latest information in agriculture.
- Source of "Valuable Tips" to improve productivity and well-being.
- An interactive community for farmers to address their issues and problems.
- Farmers can register themselves conveniently to get regular updates.
- Provides SMS and E-Mail support to the users.
- Providing portability of the whole community to be accessed from anywhere in the world.

## 7 Assumptions, if any

None.

## 8 Future Scope and further enhancement of the Project

The operability of 'Smile-Farm' can further be expanded to a wide scale by using the paid cloud databases and services to increase its current functional capacity.

## 9 Project Repository Location

S#	Project Artifacts (softcopy)	Location (Mention Lab-ID, Server ID, Folder Name etc.)	Verified by Project Guide	Verified by Lab In-Charge
1.	Project Synopsis Report (Final Version)	Lab-3210, PC55, Desktop:/Smile Farm	Name and Signature	Name and Signature
2.	Project Progress updates	Lab-3210, PC55, Desktop:/Smile Farm	Name and Signature	Name and Signature
3.	Project Requirement specifications	Lab-3210, PC55, Desktop:/Smile Farm	Name and Signature	Name and Signature
4.	Project Report (Final Version)	Lab-3210, PC55, Desktop:/Smile Farm	Name and Signature	Name and Signature
5.	Test Repository	Lab-3210, PC55, Desktop:/Smile Farm	Name and Signature	Name and Signature
6.	Any other document, give details	Lab-3210, PC55, Desktop:/Smile Farm(Company SRS)	Name and Signature	Name and Signature

## 10 Definitions, Acronyms, and Abbreviations

Abbreviation	Description
SME	Subject Matter Expert

## 11 Conclusion

Every system rides drawback with it. It is seen that technology gives much better advantages in 90% cases, but we can reduce gap of these drawbacks by implementing better platform for farmers and teaching them for solution to these drawbacks to make a better world.
